**STARTING UP**

*Midway's Greatest Arcade Hits Volume 2* supports the Sega Dreamcast Controller and the Visual Memory Unit (VMU). Make sure all controllers and VMUs are connected before turning the Sega Dreamcast power ON. All games on this compilation are 1 or 2 Player games. For information on each game's controller configurations, please see the Table of Contents for the appropriate game's location in this manual.
MAIN MENU
At the game's Title Screen, press the Start Button to access the Main Menu.

The Main Menu is your departure point to a virtual arcade complete with six classic arcade games. Press Left and Right on the Direction Button to highlight the games. To access that game, press the A Button or Start Button.

Keep reading this manual for information on how to play these timeless hits as well as how to adjust different options for each of them!

PAUSE MENUS
During a game, you can access the Pause Menu by pressing the Start Button. Each game has its own unique settings, but most are the same throughout. Use the Directional Button to navigate through the menu options. To select an option or to access a sub-menu, press the A Button. Press the B Button to go back to the previous screen. Follow on-screen instructions in the game's original attract mode.

CONTINUE
Continue the current game.

START 1-PLAYER/2-PLAYER
Begin a 1 or 2-Player game.

GAME OPTIONS
Each game will have their own options you can adjust such as difficulty, points until an extra life, turning the Auto Save ON or OFF, etc.

CONTROLLERS
You can configure your controller here. Highlight the action you want to change and press the A Button. Next, press the button you want to use for that action. When finished, highlight EXIT and press the A Button.

AUDIO/VIDEO
This sub-menu allows you to adjust the volume of the game, select from a Mono or Stereo output and even stretch and move the screen to your liking. When you’re done, highlight EXIT and press the A Button.

NOTE: YOU MAY WANT TO ADJUST THE SCREEN BEFORE PLAYING A GAME. THIS WILL GIVE YOU A MORE REWARDING EXPERIENCE WITH WHATEVER SIZE DISPLAY YOU ARE USING.

LOAD/SAVE
Make sure you have a VMU connected in Expansion Slot 1 on your Sega Dreamcast Controller. The Controller must be plugged into Control Port A on your Sega Dreamcast system before attempting to Load or Save a game. You will need 5 blocks of free space on your VMU to save your progress.

MAIN MENU
Return to the Main Menu (arcade) to select a new game.
You’re the skater and must earn the right to compete in the skate parks of the city and ultimately win the title of the champion of the skating world. You’ll begin in the middle of the “Skate City”, where all surfaces are skateable - a skateboarders dream world!

You’ll need to earn tickets for performing skillful skate maneuvers in the city. Tickets allow you to enter the skate parks where you’ll compete against the clock for gold, silver or bronze medals. “Cash” prizes are awarded to the skater if he qualifies for a medal, and after the skate park competition, the game continues back in the city for more freestyle action.

Numerous hazards and obstacles create a busy scenario in the city, and you’ll have a limited time to get to another skate park. Use “Cash” winnings to buy skating equipment from various skate shops located throughout the city.

Boards offer faster speed, Helmets allow more risk-taking for successful maneuvers, Pads give faster recovery from falls, and Shoes provide better height on jumps and quicker starts. Anything goes in this game!

### Hints & Tips
- Watch for loose cash blowing around in the streets.
- SkateboardingFree Parks will help you get points.
- Jumping over obstacles helps you earn more points.
- Try to take jumping short cuts in the Downhill Park.
- Sliding in the Ramp Park will help you get a better score.
- Make sure you pick up new gear. This helps you skate better.
- Knocking down obstacles will earn you points.
- Keep track of your time and money!
Players choose any of the four Gauntlet characters to portray. Thor the Warrior, Thrya the Valkyrie, Merlin the Wizard or Questor the Elf. Each of these heroes has their own unique capabilities. Thor the Warrior is skilled at hand-to-hand combat. Thrya the Valkyrie has strong armor, Merlin the Wizard the best magic and Questor the Elf the fastest speed.

The action begins as the players cooperate to combat waves of attacking monsters while competing for food, treasure and magic potions. Every game is a unique event as different players team up combining new skills and strategies. At level 1 players will find exits going to other levels. Players may choose to exit level 1 and jump as far ahead as level 8. On level 8 and beyond players will find themselves on any one of over one hundred different mazes.

How long a player lasts depends upon the player's "health". At the start of the game players set the amount of health with which they would like to begin their adventure. Health is lost by contact with the monsters and as a function of elapsed time. Health can be regained by picking up the food which can be found in most of the mazes.
The alien attack from overhead takes on three deadly forms, so keep your finger hot on the trigger, simultaneously firing missiles straight up at the UFOs and straight ahead to disintegrate obstacles. There are bottomless craters waiting to swallow you up, as boulders and rolling stones block your path. Watch for land mines, cannons and hungry space plants as you scream across the moon's surface. Low-flying space crafts are always on your tail to keep you alert and ready to take evasive action.

The clock ticks away precious seconds in a race against time and space, as you make your way from point to point along the constantly changing and challenging course plotted on the radar screen. Make better time to earn bonus points; score high to earn extra patrol cars. Complete the beginner course, then take on the more difficult champion course to master this great classic.

You will also receive points for avoiding obstacles such as mines, boulders and craters. If you can't avoid a boulder, remember to use your laser cannons to blast 'em away!
Players begin by selecting 'Easy Street', 'Middle Road' or 'Hard Way'. Once the street has been selected, the player is set for an awesome ride. You have full control of the bike’s acceleration or tire screeching, sudden stops. The object is simple.

Use the 'Throw' button to deliver papers to the houses on your subscription route. (Most points are scored by hitting the mail boxes.) Papers can also be thrown on Non-Subscribers' house to break windows and hit other target objects (for fun of course).

Gameplay proceeds by days of the week. Each game consists of a 7-day week starting on Monday. You must get through your route each day and try to make it all the way to Sunday. Every new day offers more excitement and challenge in the form of zany neighborhood characters and obstacles. To keep the game going, you must ride over bundles of papers to restock your supply. The game is over if all customers are lost.

PAPERBOY CONTROLS (DEFAULT)

- Pedal : Analog Up
- Brake : Analog Down
- Left : Analog Left
- Right : Analog Right
- Throw Paper : A Button
- 1-Player : Left Trigger
- 2-Player : Right Trigger

HINTS & TIPS

- Remember to pick up the bundles of newspapers you see. These will help replenish your supply and help you to make your deliveries.
- Throw your newspapers with caution. Sure you can rack up some points, but if you don’t deliver to a customer’s house, they’ll cancel their subscription!
- Watch out for moving objects. These are sometimes difficult to avoid.
- Slow down when approaching an intersection. Make sure you know how fast the cars are going before you try to cross the street!
- Stay away from storm drains in the street.
What do you do when three normal humans are transformed into towering monsters bent on destroying the country? Take control of one of them and go on a Rampage of course! The original version of Rampage comes home with all of the elements which made it an arcade classic!

Control one of three gruesome beasts and travel from city to city destroying everything in sight! George the Ape, Lizzie the Lizard and Ralph the Wolf make up the terrible trio of monsters. In your quest for destruction, you must climb buildings and pound them into the ground.

Make sure you jump from the collapsing buildings. A fall from those heights will seriously injure you. During the game you will have to fight past the many enemies such as helicopters, tanks and snipers! Destroy these enemies before they destroy you. Once you have destroyed all of the buildings you can advance to the next city.

Each building features items which will give you strength, power or cash as well as items which will hurt you. Punch holes in the buildings and punch again to grab the various items in them. All food items will help restore some of your health. There are cash items such as a safe and money bags that will help boost your point total.

Another way to gain health is to eat people. They can be either people on the street or people in the buildings you’re destroying. Just make sure they’re not holding any bombs. If you happen to swallow a bomb, you’ll be spitting fire and that’s not a good thing!
The BAD GUYS are at it again and the Freeways are no longer safe. BAD GUY Spies from all over have come to wreck havoc and chaos to this once peaceful area. Your mission is to destroy all suspicious vehicles, but not the innocent motorists that also occupy the road. This sounds difficult, so we will supply you with as much info as possible. Details are sketchy right now as to who is behind this, but our intelligence network has come up with a few of the vehicles that the BAD GUYS are using.

We've code named cars with tire disabling abilities as “Switchblades.” Bullet proof bullies have been dubbed “Road Lords,” Be wary of the “Enforcers” for they are employed with men who specialize in Double Barrel Shotguns. Make sure to clear them ALL out. Oh yes, there’s another thing - “The Mad Bomber.” It’s a fast attack Copter that loves to drop bombs. We'll supply you with the G-6155 CIA Prototype Interceptor that includes FV (fast vehicle)-Gasmata with Durani II Super Turbos, 20mm machine gun cannons, optional Super Slick anti-tailing deterrents, Wang Type IV Smoke Screens, and Sutji-Wasp Missiles.

Replenishment of armaments will be available, thanks to Weapons Vans located in key areas. We also have a Prototype Speedboat, the FB (fast boat) - JT101 on standby. The waterways are also plagued with BAD GUYS: “Barrel Dumpers” and “Dr. Torpedo” himself may be on the prowl. Delay no longer, the situation gets more critical by the second...good hunting!
